

The partner in industrial automation

Know-how, quality, capability

Inteqnion is an innovative and dynamic company, specializing in the design, manufacture and implementation of control systems for the process-industry. More than 15 years of experience makes Inteqnion a reliable partner, which delivers customer-oriented solutions in accordance with the latest technology. In addition, Inteqnion has the knowledge and skills to offer custom-made total solutions.

The process control systems of Inteqnion are used by manufacturers all over the world and are technically supported from their office in Aalten. All solutions, which are delivered by Inteqnion, are characterized by straightforward design and reliability. In other words, Inteqnion stands for quality!

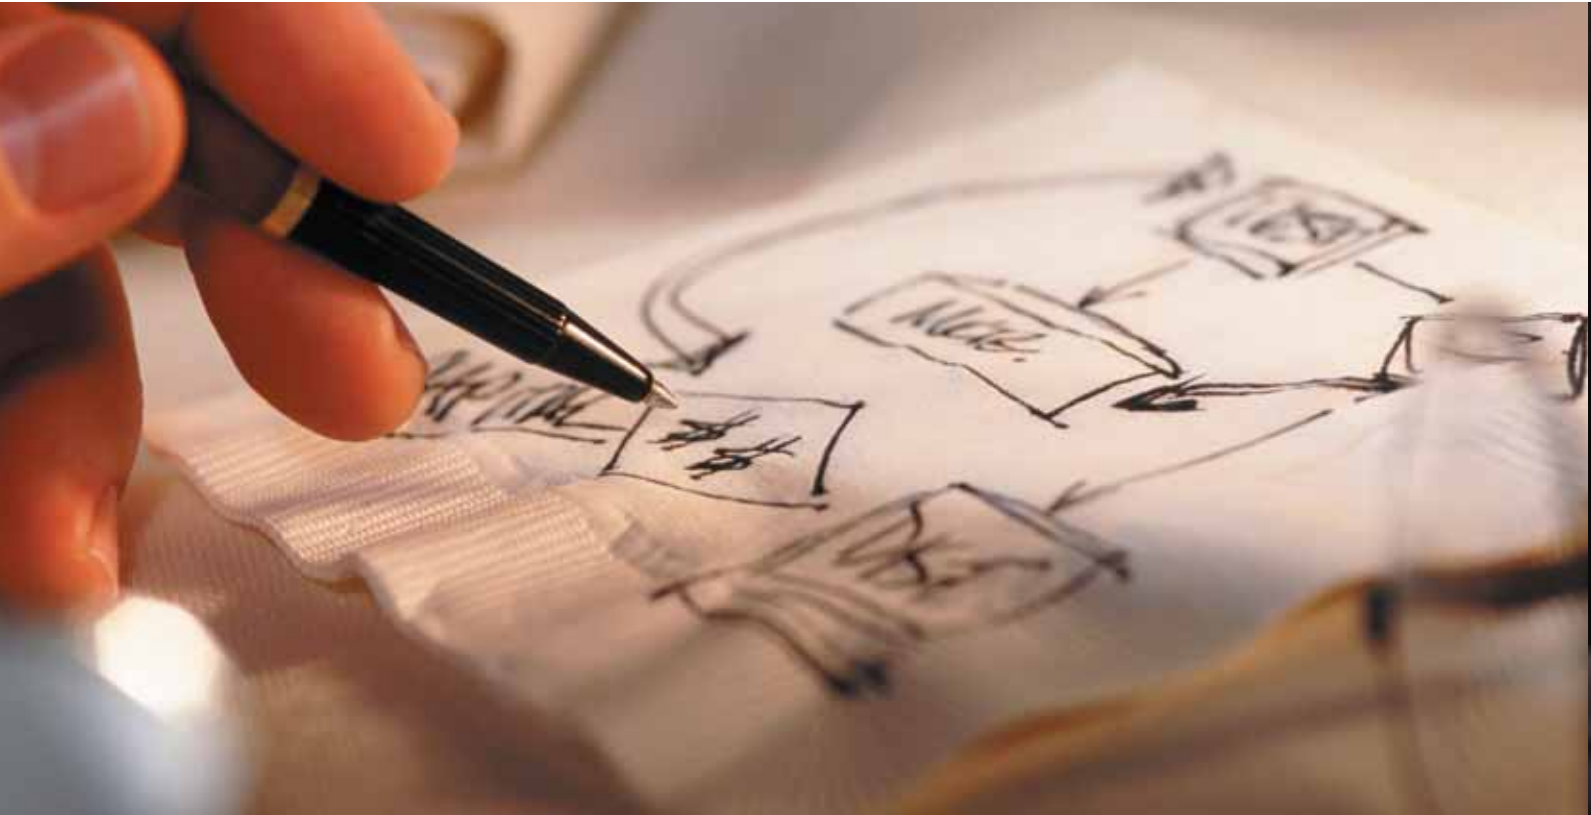

Market orientated

Inteqnion is active in a large number of markets and for that reason capable of translating the customers needs into sophisticated custom-made control and automation systems.

Inteqnion is active in the following industries:

- ◆ Grain processing
- ◆ Feed milling
- ◆ Food processing
- ◆ Process industry
- ◆ Machinery
- ◆ Textile
- ◆ Recycling
- ◆ Water purification
- ◆ Water distribution

Complete service

The strength of Inteqnion is the full service package they can offer to the customer. Inteqnion takes care of the design and manufacture of electrical installations, control panels, PLC control systems and industrial automation. For this, there are two standard software packages available which can both be integrated in the processing industry. First there is the "basic" package that has all the basic functions in it to control a batching process. This package can be extended with colour graphics (visualization).

Next, there is the "advanced" package, a state-of-the-art software package that contains all the functions to control a fully automatic batching process, for example:

- ◆ Full tracking and traceability
- ◆ Raw material reception (intake)
- ◆ Automatic pellet press control
- ◆ Bulk outloading
- ◆ A maintenance program for all equipment

Worldwide network

A large number of companies in The Netherlands and abroad have chosen the process control systems of Inteqnion. Through a worldwide network of representatives and agents, Inteqnion is able to deal the customers directly and, if required, to support them.

Most systems are supplied to companies in:

- ◆ (Eastern) Europe
- ◆ Asia
- ◆ Middle East
- ◆ South America
- ◆ Africa

Training

Inteqnion thinks further than just the sale and installation of process control systems. For example, to train your employees so that they can learn all the ins and outs of the system. By means of this training, your staff is able to control your installation and to locate and solve possible technical failures. They are also able to optimize the production process.

The training takes place in our training center in Aalten, but also on your site.

INTEQNION

PROCESS CONTROL SYSTEMS

Service and support

To guarantee the continuity of the delivered systems, Inteqnion is available for you at any time in case of emergencies. A large number of installations are computer controlled and can be supported by modem or internet connection from Aalten. In this case it doesn't matter if the installation is situated in The Netherlands or abroad.

Inteqnion's service department, is available 24 hours a day, 7 days a week, for solving technical problems, equipment failures, adjusting the system or to maintain the control system. These activities can be done on site or remotely via modem or internet.
